# China Global Investment Tracker

## CHINA GLOBAL INVESTMENT TRACKER

*Editor's note: The value of China's overseas investment and construction combined since 2005 is approaching \$2 trillion. In 2018, state-owned enterprise investment and construction receded, health care drew new attention, and the number of countries in the Belt and Road Initiative soared. The US has restricted China's technology acquisitions and other countries may follow.*

The China Global Investment Tracker is the only comprehensive data set covering China's global investment and construction, which are documented both separately and together. Inaugurated in 2005, the CGIT now includes 3100 large transactions across energy, transportation, real estate, and other industries, as well as 280 troubled transactions. The [full list](#), with the amount, Chinese parent company, host country, and sector, is available for public use with the proper citation. The tracker is published by the American Enterprise Institute.

The interactive map filters investments and construction by sector, region, country, and year.
